PROFILE

Product-focused frontend engineer building React and TypeScript applications, reusable interfaces and data-rich workflows. Leads engineering at Tututor.ai / EduNova, with end-to-end experience across Node.js APIs, AI integrations and mobile apps. Earlier work includes analytics, file management and multilingual booking products. Available immediately.

EXPERIENCE

Lead Engineer / Full-Stack Engineer | Tututor.ai / EduNova

Nov 2023 - Present | Remote | Murcia, Spain

- Ship teacher workflows for lesson-topic chatbots, AI quiz generation, automated grading and class insights; moved AI calls and API keys server-side.
- Lead engineering across eight connected education products used by 20,000+ students, teachers and families.
- Led a small team across mobile and web delivery; now work directly with the founder on product and engineering.
- Build and maintain a shared Express / MongoDB backend with approximately 1,000 API endpoints and 90 models, including school-scoped data access.
- Built a Plumier XXI data export with 1,833 of 1,833 golden-test cases passing.

React Developer | Danzee Tech

Jan 2022 - Jan 2024 | Viby, Denmark

- Delivered Jurri file, inbox and password-vault interfaces; reduced initial load time by approximately 40% through code splitting, lazy loading and bundle optimization.
- Built reusable React components and hooks across client products, alongside Node.js / Express integrations, authentication and payment workflows.

SELECTED PROJECTS

Viloi | AI writing SaaS | viloi.com

Built a paid AI writing product with OpenAI, Claude and Gemini fallbacks, JWT authentication, and Stripe subscriptions and webhooks.

Illume | AI business analytics | www.joinillume.com

Built adaptive AI-generated analytics and dashboards for revenue, bookings and retention, with Boulevard, Zenoti and Vagaro data integrations.

Yaksport | Sports travel booking | yaksport.dk

Built a Danish / English booking interface with search and filtering for a sports travel agency serving 100+ clubs.
