PROFILE

Full-stack engineer building production applications from scratch with React, TypeScript and Node.js, turning Figma designs into precise, responsive interfaces backed by REST APIs and SQL or MongoDB data. Leads engineering at Tututor.ai / EduNova across web products, shared backend services and mobile apps. Built a bilingual travel booking interface for a sports travel agency. Based in Pakistan. Available immediately for remote work.

EXPERIENCE

Lead Engineer / Full-Stack Engineer | Tututor.ai / EduNova

Nov 2023 - Present | Remote | Murcia, Spain

- Lead engineering across eight connected education products used by 20,000+ students, teachers and families.
- Build and maintain a shared Express / MongoDB backend with approximately 1,000 API endpoints and 90 models, including school-scoped data access.
- Deliver Socket.io / Redis messaging, R2 file storage, Stripe and SEPA billing, and three React Native apps released on both app stores.
- Led a small team across mobile and web delivery; now work directly with the founder on product and engineering.

React Developer | Danzee Tech

Jan 2022 - Jan 2024 | Viby, Denmark

- Built reusable React components and hooks across client products, alongside Node.js / Express integrations, authentication and payment workflows.
- Delivered Jurri file, inbox and password-vault interfaces; reduced initial load time by approximately 40% through code splitting, lazy loading and bundle optimization.
